

# Enhanced Living Designs

## An Accessibility and Construction Company

### **SCOPE OF WORK:**

Provide and install one custom home elevator with Hydraulic Chain Unit, 110V AC Up DC Down. Provide and install 34" X 44" custom platform. Install proposed unit in corridor area which will lead to upstairs master bedroom. A new door opening will need to be created to provide access. Cut out opening on North wall of Master bedroom to accept framing for 36" 6 panel door. Run electrical for safety inner locking mechanism. Create custom cover for elevator hydraulic chain unit. Color match cover with existing interior color.

### **Optional Scope of work:**

Remove master bathroom shower stall entry step and create a ramp from the exterior floor area into the shower floor. Concrete mud and hot mop ramp area for waterproofing. Cut carpet for proposed ramp area. Existing carpet to remain the same.
